Do Duong Dang Khoa

Software Engineer

0396-090-487 doduongdangkhoa1103@gmail.com Ho Chi Minh City

OBJECTIVE

A highly motivated and quick-learning software developer recently graduated, seeking an efficient and growth-oriented environment to kickstart my career. I aim to build strong foundations in both backend and frontend development, working toward becoming a Fullstack Developer. My 5-year goal is to grow into a Team Lead role, where I can contribute to delivering high-quality products and drive meaningful impact within the organization.

EDUCATION

FPT University, HCM Campus Sep.2021 - Nov.2025

Software Engineering

GPA: 3.19/4

WORK EXPERIENCE

FPT Software Academy Jan.2024 - Apr.2024

Backend Developer Intern

- Joined a real-world Agile team to develop internal web systems.
- Built RESTful APIs with **Java Spring Boot** and **PostgreSQL** or managing users and data.
- Implemented JWT-based authentication and role-based access control.
- Fixed bugs, optimized SQL queries, and wrote documentation.
- Collaborated using GitHub and Trello in a fast-paced environment.

PROJECTS

KOINE | Capstone Project - Sex Education Platform for Adolescents Dec.2024 - Jun.2025

Leader the Back-end team

Capstone - School project: KOINE
Team size: 1 BE, 1 FE, 2 MOBILE
Tech-stacks:

- Back-end: Nest.JS
- Database: PostgreSQL
- Front-end: Next.js
- Mobile: React Native
- Third parties: PayOS, ViettelPost, Google OAuth 2.0
- Deployment: AWS (RDS, S3), Vercel
- Version control: Git

Led the backend development of KOINE, a full-stack sex education platform designed for adolescents, parents, and content managers, with both web and mobile interfaces:

- Designed and implemented RESTful APIs using **NestJS**, applying modular architecture and clean code principles.
- Integrated JWT-based role-based authentication and authorization to manage secure access for multiple user roles (Admin, Parent, Child, Content Manager).
- Developed backend logic for course management (creation, updates, tracking) and enabled parental monitoring by allowing parents to assign and follow their children’s learning progress.

- Built content management APIs to support article publishing and editing by content managers.
- Integrated third-party services such as **PayOS** for secure payments and **ViettelPost** for product delivery (e.g., educational kits, gifts).
- Collaborated closely with frontend and mobile teams (1 FE, 2 Mobile) to ensure seamless integration of APIs with UI/UX workflows.
- **Technologies:** NestJS, PostgreSQL, AWS RDS, React Native, Next.js, PayOS, ViettelPost

EXAM SCHEDULE MANAGEMENT SYSTEM | SWP Course Project - Exam management application for FU HCM (ESMS) Sep.2023 - Dec.2023

Back-end team member

SWP Course - School project: EXAM SCHEDULE MANAGEMENT SYSTEM
Team size: 3 BE, 2 FE
Tech-stacks:

- Back-end: Node.js, Express.js, Sequalize, Node-Cron
- Database: MySQL
- Front-end: ReactJS, Antd, Vite, Chart.js
- Third parties: Passport, Google OAuth 2.0
- Deployment: FreeDB, Vercel
- Version control: Git

Participated in the development of an exam scheduling system for FU HCM, supporting role-based access and management for administrators, staff, lecturers, and students:

- Designed and implemented RESTful APIs using **Node.js** with role-based access control for secure user registration and scheduling workflows.
- Built endpoints to import and update exam schedules from Excel files, enabling batch processing per academic term and supporting invigilation assignment.
- Developed automated email notifications and implemented business logic to handle registration closures based on timeline and user role.
- Optimized MySQL queries to ensure responsive data retrieval and consistency across large datasets and academic terms.
- **Technologies:** Node.js, MySQL, ReactJS

HONORS & AWARDS

Honorable Student (FPT University): Spring 2025	Apr.2025
Honorable Student (FPT University): Fall 2024	Nov.2024
Honorable Student (FPT University): Summer 2024	Jul.2024
Honorable Student (FPT University): Spring 2023	Apr.2023
50 % Merit-based Scholarship	Sep.2021

SKILLS

TypeScript	1.5 years experience in developing backend logic
JavaScript	5 months experience in dynamic web apps
Java OOP	4 months experience with object-oriented design
C#	4 months experience in .NET environment
MS SQL Server	1.5 years experience in relational databases
PostgreSQL	1.5 years experience with query optimization
MySQL	4 months experience in CRUD operations
MongoDB	3 months experience in NoSQL document database
NestJS	8 months experience in building RESTful APIs
ASP.NET Core	4 months experience in web services development
HTML / CSS	6 months experience in responsive web design
GitHub	2 years managing source code and collaboration
Trello	8 months experience in agile task management
